Information You'll Need to Get Started

To download your transactions with Quicken, you must have Internet access. In addition, to complete setting up your Quicken accounts with transaction download you will need to log into the www.nufcu.com Web site and go to Homebanking. At the password prompt, you will see an option called "Register this computer". Make sure this is selected to prevent Security code and question window popups for each sub-account.

This guide will show you how to setup and download your accounts. For step-by-step help with an online task, choose **Learn About Downloading Transactions** from the Quicken **Help** menu.

Important: First, get the latest program updates!

To get the latest directory of participating financial institutions and program updates click **Update** on your Quicken toolbar. In the dialog, click **Update Now**, Quicken will automatically check for available updates. When this download process is complete, **exit** and **restart** Quicken.

Special note to former QIF Import users

Web Connect offers superior download capability. You will enjoy an easier, and more accurate download, without having to import and find your file, worry about duplicates, or even manually launch Quicken! You can convert your existing Quicken account to download via Web Connect. If your financial institution offers multiple download options on the Web site, be sure to select **.QFX Web Connect** – not the older .QIF file format.

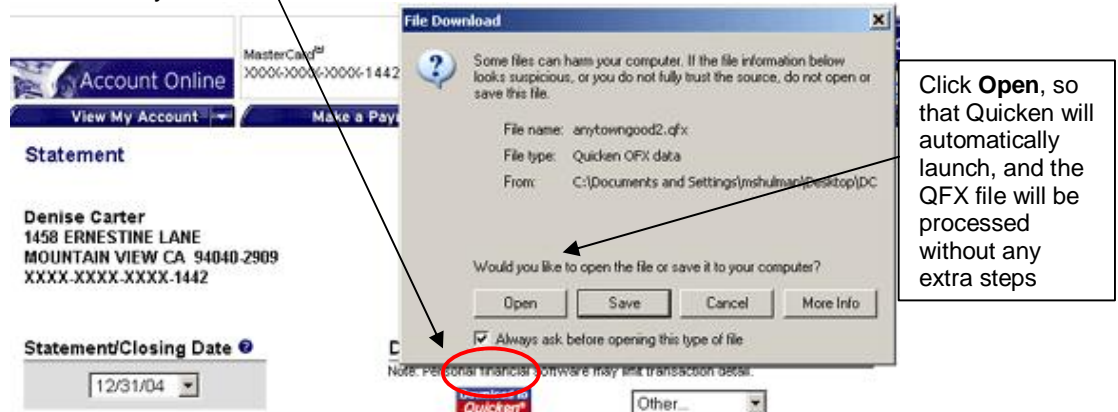

It's easy to switch from QIF, simply follow the steps in the next section.
